GOONVIZ presets & knobs A–D

Knobs K1–K4 (and bank B faders F1–F4) change meaning per preset.

#	PRESET	A (K1)	B (K2)	C (K3)	D (K4)
1	**Astral Mandala**	petals	layers	filigree	color drift
2	**Fractal Temple**	symmetry	spread	fold angle	color
3	**Liquid Spirit**	turbulence	filaments	filament count	color
4	**Quaternion Julia**	shape	4th-dimension slice	detail (heavy)	color
5	**Crystal Caverns**	cave scale	wall thickness	quality (Pi: keep low)	color
6	**Tesseract Lattice**	beam thickness	4D spin	beat snap	color
7	**Apollonian Lace**	inversion	drift	lace brightness	color
8	**Wormhole**	twist	segments	ornament	color
9	**Bioluminescence**	cell size	wobble	nuclei	color
10	**Julia Bloom**	seed angle	morph speed	detail	color
11	**Mandelbox**	fold scale	camera distance	detail (heavy)	color
12	**Apollonian Foam**	bubble size	drift	detail (heavy)	color
13	**Hyper Crystal**	fold angle	4th-dimension slice	facets	color
14	**Hypergyroid**	cave scale	4D spin	wall thickness	color
15	**Spirit Mirror (video)**	edge gain	aura	body fill	color
16	**Video Melt (video)**	melt	flow speed	contours	color
17	**Video Fractal (video)**	folds	spread	tint	color
18	**Hyperbolic Mandala**	polygon sides	meeting at each corner	flow	color
19	**Kaleido Bloom**	petals	layers	inner detail	color
20	**Crystal Kaleidoscope**	cell size	turbulence	camera (0 = none)	color
21	**Kaleido Tunnel**	segments	rings per depth	ornament	color
22	**Mandala Mandelbox**	fold scale	symmetry	detail	color
23	**Prism Shards**	shard size	refraction	seed light	color
24	**Cicada Wing**	wing spread	vein density	iridescence	color
25	**Mycelium**	network scale	thread sharpness	pulse speed	color
26	**Nautilus**	spiral growth	chambers	nacre sheen	color
27	**Alien Jungle**	leaf size	sway	fireflies	color
28	**Fractal Cathedral**	hall width	twist	beat snap	color
29	**Mandelbulb Bloom**	power	orbit distance	detail (heavy)	color
30	**Chrome Lattice**	tube thickness	ripple	beat snap	color
31	**Hyperbolic Honeycomb**	edge thickness	look around	stained glass	color

SHOW CHECKLIST

1. Power the MPD32. It starts on preset **1 LiveLite**, which is what this sheet is for.
2. Switches S1–S8 toggle: press once for on, again for off.
3. Bring MASTER (F8) up. Keep a finger near **BLACKOUT** (S7) or ■ STOP.
4. **Autopilot** (S1 / ▶ PLAY) switches presets and keeps every knob moving. Bank B F7 sets intensity, from calm to wild. Any knob you touch, autopilot leaves alone until the next switch.
5. Save looks: S8 SHIFT on, hit a blue snapshot pad, SHIFT off.

IF SOMETHING'S OFF

- Pads do nothing: on the Pi run `run.py --learn-pads` and hit the pads in order.
- Change any control: plug in a keyboard, `H`, ↑↓ to choose, `L`, move the control.
- Then reprint: `python tools/make_cheatsheet.py`
- No reaction to music: check the audio input, then raise Mic sensitivity (bank B F8). Audio react (bank B K5) sets how hard it hits.

KEYBOARD

`←` `→` preset · `R` randomize · `B` blackout · `A` autopilot · `Space` flash · `H` overlay · `F1`–`F8` snapshots · `Esc` quit
